mohamedng098@gmail.com   +(212) 762 77 24 81   linkedin.com/in/nogot Rabat, Morocco

Career objective:

I am a highly motivated Software Engineer with 1.5 years of experience in the field. My expertise lies in designing, developing, and maintaining software solutions for complex systems. I bring proficiency in a diverse range of programming languages and technology stacks, allowing me to create efficient and scalable solutions aligned with business and customer requirements.

Professional Summary:

• Proficient in software engineering within an Agile framework, with a strong grasp of the software development lifecycle.

• Experienced in software development using Java and other relevant programming languages and tools.

• Knowledgeable in data management and databases, including Oracle.

• Proficient in utilizing development collaboration tools such as Jira.

• Effective communication and collaboration abilities, facilitating interactions with cross-functional teams, clients, and stakeholders to deliver high-quality software solutions.

• Demonstrated aptitude for teamwork, fostering efficient collaboration with fellow team members.

• Strong problem-solving and analytical capabilities, coupled with solid data analysis skills.

Technical Skills:

- Programing languages: Java,Php, Javascript(ES6+), Typescript.
- Web & Frameworks: ReactJs, Angular, Spring boot, Laravel, Html5,Css3.
- Version Control System: Git, Github, Gitlab.
- Database management: Mysql, Oracle, PostgreSql.
- Software development methodologies: Agile, Scrum .
- Testing and quality assurance: Unit testing.
- DevOps: Docker, Kubernetes, Jenkins.

Experience:

Full stack developer   Orsys 05/2023-Present

- Coding Best Practices: Implementation and application of industry-leading coding best practices and standards to maintain exceptional code quality, promoting streamlined project delivery and optimal efficiency.

- Documentation: Proficient in documenting software designs, specifications, and technical processes for future reference and knowledge sharing.
- Teamwork and Collaboration: Recognized for outstanding teamwork and collaboration, contributing to a positive and productive work environment.
- Technologies: Skilled in a range of technologies, including:
    - Languages: Java, Vert.x, PL/SQL, Python, TypeScript.
    - Web Development: React.js, Ant Design (AntD).
    - Database: Oracle, Oracle Toad.
    - Web APIs: FastAPI.
    - Version Control: Git, GitHub.
    - Project Management: Jira, Confluence.
    - Software Development Methodology: Scrum.

Full stack developer   Copag 09/2022-04/2023

- Collaboration within a dynamic architecture team of 12 talented individuals.
- Active contribution to the development of new features for a national project used in COPAG agencies across Morocco.
- Design and analysis of softwares solution.
- Creation of documentation and specifications.
- Technologies used: Node.js, Angular, TypeScript, SQL Server, SQL, Git, GitLab, ClickUp, Office 365.

Full stack trainee   Matious 03/2022-06/2022

- Developing marketplace platform facilitating interactions between companies and clients (B2B, B2C.
- Designed and implemented the database schema to support product listings, client profiles, and transaction history.
- Conceived and analyzed a software solution using Uml.
- Developed REST API endpoints for client interactions.
- Implemented authentication and authorization mechanisms for platform security.
- Conducted performance analysis and optimization to enhance platform responsiveness.
- Technologies used: Laravel, Reactjs, Redux Toolkit, MySQL, Git, GitHub.
- Project management tools: Trello,Slack,Scrum.

Education:

Master of Science in Computer Science

- National school of applied sciences Al-Hoceima, Juin 2022

Languages:

English: Fluent   *Spanish*: Conversational   *French*: Conversational   *Arabic*: Fluent
